

# Sentinare

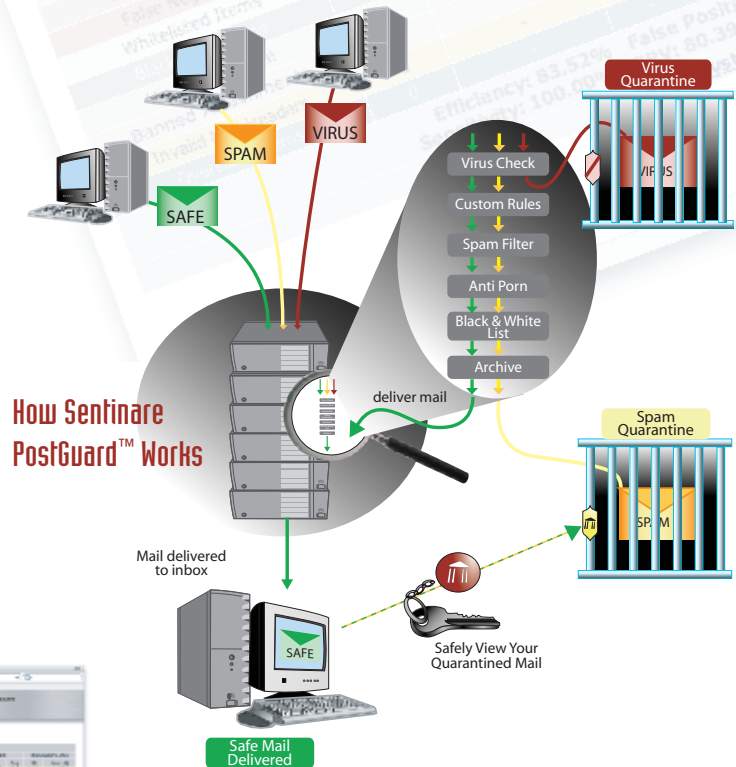

## Sentinare PostGuard™ filters out over 99% of spam and 100% of viruses before they ever reach your network.

PostGuard™ achieves industry leading accuracy through an extensive set of highly customized algorithms and an enormous database of known spam and spammers. All malicious content is quarantined to ensure no valid emails are ever lost. With anti-virus scanning and outbound filtering, PostGuard™ provides complete email security to combat today's growing threats. Activation is simple, and only requires changing your domain's MX records. There is no software or hardware to install, no updates to worry about, and no changes to your network. Your users will simply notice spam and virus free email.

### Sentinare PostGuard™ Features:

- **Filtering Accuracy** – Sentinare PostGuard™ blocks 99% of spam
- **Virus Protection** – Our virus filters are 100% accurate and always updated with the latest virus definitions
- **Smart Filters** – Learn from email content to increase accuracy
- **Custom Rule Sets** – Domain-specific White and Blacklist, user-specific thresholds, and much more
- **Flexible Quarantines** – spam and viruses get trapped at a server level quarantine that can be set up by domain, department, or individual user
- **Mail Queuing** – If your server goes down or requires maintenance, Sentinare will queue email and forward when your server is back up
- **Optional outbound filtering** – keep malicious content from originating from within your network
- **Outbound (secure) relay services** – No more outbound email hijacking when you're at a hotel or on a wireless network. Use Sentinare's secure, authenticated outbound relays when on the road for maximum protection
- **Encryption** – Securely connect to our servers via TLS and SSL

### Inexpensive and Easy to deploy

- Works with your current mail server
- No hardware or software to install or maintain
- Nothing technical to learn or do. No changes to any of your computers
- Requires only a simple change to your DNS (change MX records)
- Works with any in-house mail server including MS Exchange, Lotus Notes, Sun, UNIX, Linux, Eudora, Macintosh, and all others
- Average pricing is less than \$2.00/user/month with no setup fees and no long term contract

### Testimonials:

We've examined many spam control options for both clients and for our own use. When we tried Sentinare **we were struck by both the ease of implementation and by the flexibility** it provided us in tailoring the service to our specific requirements. We route several domains' email through the Sentinare service – some of which are heavy spam receivers – and have been able to tune the service to exactly the level of filtering we needed. We've tried the "big guys", but Sentinare was the service that delivered on the promise.

Harry J. Regan, CISSP, PSP – Managing Partner  
SunStorm Security Group

I have had no SPAM in my inbox for several days. I have not had that experience in years. I am not exaggerating. That is the literal truth. Furthermore, my partner thinks I was a genius to find you guys. **He loves having NO SPAM. I can't believe we put up with it for so long. Thanks!**

Emilienne Ireland – President  
Campaign Advantage

So far the managed service is awesome. Easy to deploy and easy user interface. **So far our 65 users have had zero spam and zero viruses come through via Sentinare. Nice!**

Andy Burge – IT Manager  
Wythewill Distribution
